

# UniSampler

with hose

## UniSampler with hose

and hose weight made of stainless steel. Sampler for deep, narrow and hard-to-reach spots. The heavy stainless-steel tube brings the hose to any desired depth. The samples are also collected using a hand-operated vacuum pump and transferred directly into the sampling bottle to ensure sampling purity.

### Operation

1. Lower the suction hose into the medium. 2. Attach the sampling bottle to the adapter. 3. Create a vacuum using the handpump and collect the sample. 4. Remove the filled sampling bottle, close and label it.

- PVC suction hose, 2,50 m long
- Supplied complete in case

## UniSampler

with flexible hose

		Price/Unit of (X) units	Article No.	
incl. sample bottle PP 1000 ml, hand-driven vacuum pump and adapter for all sample bottles, 1 hose weight made of stainless steel 304, 20 seal-it bottle seals, handy transport case	(1)	<b>119,00</b>	<b>5612-2</b>	N4

Suction hose for replacement		(10) <b>1,23</b>	<b>5612-21</b>	N4

# UniSampler „Ex“

for flammable liquids (VbF Hazard Class AI)  
in hazardous materials such as gasoline

## UniSampler „Ex“

Specially developed for sampling flammable liquids of hazardous materials VbF Hazard Class AI (VbF is the German Regulation concerning Flammable Liquids). Glass bottle and hose are connected in such a way that they conduct electricity and are grounded via a grounding cable.

### Operation

1. Ground the device. 2. Immerse the suction hose to the required depth. 3. Attach the adapter to the sampling bottling. 4. Generate a vacuum with the manual pump and collect the sample. 5. Remove the filled sampling bottle, close it and label it.

- PTB approval D-333-009 618/00
- Delivery complete with 4 m hose, glass bottle, vacuum pump and grounding cable in transport case

The UniSampler „Ex“ was developed in co-operation with the quality association Tankschutz e.V. (non-profit association for tank protection).
