

TeleScoop

for industry and water treatment

TeleScoop

Versatile sampling system with exchangeable tools for a wide range of applications. The tools (angular beaker, pendulum beaker, bottle holder, stainless steel beaker) are attached to the rod by a practical snap-in joint. Ideal for sampling from baths, tanks, shafts, open waters. Sampling depths down to 6 m can be reached with the adjustable telescopic aluminum rod (see Table).

1 Telescopic rod

The four different tools can be attached to the telescopic rod (snap-in joint).

NEW The telescopic rods have been optimized

- The individual rods have been provided with an end stop so that one rod cannot accidentally slip out of another rod.
- The telescopic rods cannot be rotated radially, which means even better handling!
- Increased telescopic rod rigidity by using cold-rolled profile rod.
- Optimized lengths !

2 Angular beaker

Adaptable to different container shapes by adjustable angle setting (up to 90°).

- Three sizes
- Polypropylene

3 Pendulum beaker

This beaker automatically swings to a horizontal position. Nothing can be spilled. Suitable for deep and narrow shafts (130 mm dia.).

- 3 Sizes
- Polypropylene

4 Bottle holder

Holds all bottles up to 95 mm dia. Plastic, glass or metal bottles can be safely filled. Angle adjustable up to 90°.

- With universal quick-clamping belt
- PP/Aluminum

5 Stainless steel beaker

With scraper edge, capacity 1000 ml. Ideal for powders, granules, pastes, sludge.

- Sterilizable
- Made of stainless steel 304

1 Telescopic rod

Aluminium, for TeleScoop
