

QualiRod

conical, for pastes, cheeses, greases, wax

QualiRod, conical

conical hand-drill, conically shaped, with sharp cutting edges and a solid handle. Ideal to cut out samples from soft, paste-like substances (cheese, butter, clay, loam, soap, wax, etc.). Drilling depth 13 cm, total length 175 mm, weight 96 g.

- Stainless steel 304
- Sterilizable
- According to ENISO 707

QualiRod

cylindrical, for pastes, cheeses, greases, wax

QualiRod, cylindrical

cylindrical hollow drill with a sharp cutting edge. The hand-drill can easily be driven into paste-like and semi-solid substances by a rotating movement. The samples cut out are subsequently removed from the drill using the push-rod ejector. Drilling depth 20 cm, total length 260 mm, weight 386 g. Inside diameter 8mm, Outside diameter 10 mm.

- AISI 304, sterilizable

Micro Double Spatula

Micro Double Spatula

For small samples. Made of stainless steel with a rectangular and a round spatula blade. Ideal for sampling small quantities of pastes, cremes, emulsions and powder.

Spatula

for pastes, greases, creams

Spatula

universal instrument for the collection of pastes, creams, slurries, etc.

- Available in two sizes
Blade made of stainless steel 304 and wooden handle
