

# Tamper Evident Cap-Seals

Tamper evident seals are a low-cost way to add value and integrity to your products that are packed or transported in drums.

In line with current packaging trends there is an increasing requirement for tamper evident seals on drums, especially those bound for export. In response to this demand 3 Swans Ltd. is now stocking three types of tamper evident cap-seals. The types of bungs our seals fit are outlined below.

## How Do They Work?

Cap-seals are available in either crimp-on or press-on/snap-on, as listed below. They fit over the drum closure and must be prised off to open the drum.

### Rieke Safe-Seal (Crimp-on)

- Sizes: - 3/4" (20mm) and 2" (50mm)
- Materials: - Plastic cap with aluminium breakaway seal/rim, white/metal.
- Method: - A crimp tool for each sized cap seal is required. The metal band is crimped firmly to the closure.
- To Fit: - Rieke drum bungs 3/4" and 2", buttress or NPT threads.
- Codes: - 800440 3/4" Rieke Safe Seal PX-1-050  
800445 G30 Crimp tool for 3/4" Safe Seal  
800450 2" Rieke Safe Seal PX-03-050  
800460 G10 Crimp tool for 2" Safe Seal

### Rieke Titegrip (Press-on)

- Sizes: - 3/4" (20mm) and 2" (50mm)
  - Materials: - All plastic, High density polyethylene, white
  - Method: - Press on firmly by hand. Seal has a scored breakaway ring that separates on removal. No tools required to apply cap.
  - To Fit: - Van Leer-Trisure, Vertex 60 and 200lt drums and Visy steel drums.
- NB. These cap-seals do not fit Rieke drum bungs.
- Codes: - 800441 20mm APT-1-5000 Press-on Titegrip  
800453 50mm APT-3-5000 Press-on Titegrip

### Mauser Typer (Press-on)

- Size: - 2" (50mm) only
- Materials: - All plastic, polypropylene, red
- Method: - Press on firmly by hand. Seal has a scored breakaway pull-tab. No tools required to apply cap.
- To Fit: - Mauser drum bungs
- Code: - 800462 DC612 snap-on cap-seal
