## WHAT'S NEW?

With the new year well under-way we decided it was time for another newsletter update. In this issue we explain the differences between our drum pumps and feature a new syphon action pump. We also have limited stocks (on special) of a drum pump that operates on compressed air. We have a new team member, Andrew Brodie, who is doing our dispatch now. Andrew is a Glas-

wegian who has been in NZ for 38 years. He enjoys making fruit wines (which we are yet to sample). Our congratulations to Kevin Crosswell of Plastic Box Botany who won the competition from our last newsletter. This edition you could win an Easter Egg gift basket, so if you're reading this newsletter let us know by entering. We were pleased with the response last time, and thanks to those of you who entered. We

were also pleased with the number of customers who congratulated us on our Christmas donation to The Tear Fund, rather than sending out Christmas cards. Thanks to those of you who let us know that you supported that move.

John and Jo McCracken, Andrew Brodie  
3 Swans Ltd.

## WE'LL TELL THE POSTIE

We'll tell the postie, but we also need to tell you that from 1 April we will no longer have a PO Box. Please update your records so that our mailing address is the same as our physical address:

13 Sycamore Place  
Pukete  
HAMILTON 3200

We have enclosed a note to alert your accounts and/or purchasing people so we'd appreciate it if you could please pass that on to the relevant people.

**Venting customers** please note that the venting workshop address is: 69 Ranui Street Hamilton  
Caps for venting should be directed there, not to our office.

## EASTER HOLIDAY

We will be closed for the Easter Holiday from Friday 21 March until Tuesday 25 March. We wish you a safe and happy Easter.  
Please drive carefully if you are going away.

## COMPETITION

With Easter being in March we've decided to put you in the draw to win an **Easter Egg Gift Basket**. Simply email or fax or email us with the answer to this question by 17 March 08. The winner will be notified by phone.

Question:

What is the flow rate of the Beckson CP12SP jerry can pump with Goose Neck Spout?

Answer: \_\_\_\_\_

Name & Contact Number: \_\_\_\_\_

Company Name: \_\_\_\_\_

(Fax to 07 8509582)

# They don't call us DISPENSING SOLUTIONS for nothing

Introducing the new Beckson high volume chemical drum pump. We have just added this to our already comprehensive range of chemical drum pumps. Below is a table detailing the other drum pumps in our range. Please enquire for specific pricing based on quantities.

**Special Newsletter Trial Offer:** Order 1-5 pumps and pay the 5+ rate if you say you saw it in this newsletter (valid for orders placed before 30 April 08)

Our Code: 132134  
 Name: Beckson 236-PF4  
 Features: A hand pump that operates by syphon or lift action  
 Construction: Wide body and outlet hose of clear PVC, 27mm outer diameter x 1200mm long  
 Flow Rate: 800ml per stroke or 20lt per minute when syphoning  
 Adaptor: 2" NPS (we can supply adaptors to suit other threads as well)

**NEW PRODUCT!**

## Benefits & Tips

- » **Safety:** No heavy lifting to tip drums or jerry cans, no leakage from drums left on their side causing hazards and wastage.
- » **Control:** More measurable and less wastage from spillage caused by tipping.
- » Unless a drum is fitted to a tipper we recommend a drum pump rather than a tap for decanting. This is so the liquid is not in constant contact with the tap causing undue stress and possible leakage from corrosion.
- » Beckson strap locks increase safety and security. They are able to be padlocked and you can hook the outlet hose into it to stop run-on.
- » The bodies are made from high impact PVC.
- » Seals are Viton which is compatible with a wide range of chemicals. We have a list of substances that are not suitable for use with these pumps as well as comprehensive chemical compatibility charts so if in doubt please check with us first.
- » To prolong the life of your pump we recommend regular flushing with a soapy solution.

Description	Action	Body & Outlet	Flow Rate*	Adaptor	Image
Beckson CP1848-S Chemical transfer pump for drums or jerry cans With Straplock. 132000	Lift and syphon	Small body, supplied with extra dip-tube for use in drums. Outlet hose is 14mm OD x 1200mm long.	225ml per stroke or 5lt per minute siphon	2" NPT (fine thread) or can be fitted to caps 45mm and larger (individual codes for jerry cans dependent on capsizes).	
Beckson 236-PF3 for drums. 132130	Lift action (see 236-PF4 for syphon version)	Wide body & outlet hose (32mm OD x 910mm long)	800ml per stroke	2" NPT (fine thread).	
Beckson CP12SP jerry can pump with goose neck spout outlet. 132013	Lift action	Small body specifically for use in jerry cans. Goose neck spout ensures product drains back into the container.	150ml per stroke	2" NPT (fine thread) or can be fitted to caps 45mm and larger. No straplock.	
Beckson 9A-V petrol pump 132150	Syphon or lift action	Specifically for use with fuels	110ml per stroke, 4lt per minute siphon	Inlet and outlet hose as shown. No Straplock.	
Beckson 224-PF Water Meter Pump (not for drinking water) 132164	Lift action	Specifically designed as a portable water pump. 600mm body and 600mm outlet hose.	500ml per stroke	No adaptor fitted. Stone strainer also available.	
Beckson 136-PF6 Water Meter Pump, pump (not for drinking water) 132170	Lift action	Specifically designed as a portable water pump. Body is 900mm long with 1.8mm outlet hose.	1lt per stroke.	No adaptor fitted. Stone strainer also available.	
Rieke M855-N metal drum pump for solvents 107720	Lift action	Zinc plated, nylon piston for use with solvents. The goose neck drains back into the container.	225ml per stroke	2" BSP (fine thread)	
Drum Mate DM-85DGP 120000	Air operated	Complete kit includes dispenser nozzle, mini air regulator with viton seal. Suitable for non-flammable liquids compatible with PP, with particulates less than 2mm. Not suitable with IBCs.	60lt per minute (dependent on viscosity and temperature)	2" BSP. Also available is the Thread Guard Drum Pump Adaptor DM-88BTG 2" NPT plated steel for use on steel drums.	

**Special Offer: Drum Mates now \$207.50 + GST, usually \$415. Buy 5 and get a further 10% discount (stock limited)**

NB Flow rates are based on water viscosity. Actual flow rates will vary depending on the viscosity and temperature of the liquid you are pumping.
